

IN THE CLAIMS

Please amend the claims as follows:

Claim 1 (Currently Amended): A method for producing pharmaceutical forms or parts of pharmaceutical forms or food supplements or parts thereof, comprising

by coating substrates with a mixture of two film-forming coating agents which may comprise further pharmaceutically customary additives, especially plasticizers and/or an active pharmaceutical ingredient,

where the first film-forming coating agent

is a (meth)acrylate copolymer of 30 to 80% by weight free-radical polymerized C₁ to C₄ alkyl esters of acrylic or methacrylic acid and 70 to 20% by weight (meth)acrylate monomers having a tertiary amino group in the alkyl radical,

and the second film-forming coating agent

is a polymer having anionic groups,

with the proviso that the film-forming coating agents comprise, based on the dry matter of the mixture, no or not more than 20% by weight of a plasticizer and no or not more than 5% by weight of a nonionic emulsifier, wherein

~~characterized in that~~

the film-forming coating agents are initially separate from one another in the form of liquid, sprayable solutions or dispersions, and

are simultaneously sprayed by spray application using one or more spray devices which, singly or together, atomize liquids separately, and whose spray beams overlap,

in such a way that the incompatible individual portions are mixed in the spraying process, the mixture impinges on the substrate and forms thereon, after evaporation of the water, a film coating, resulting in the pharmaceutical form food supplement or parts thereof.

Claim 2 (Currently Amended): The method as claimed in claim 1, ~~characterized in that wherein~~ the substrates are active ingredient crystals, active ingredient-containing cores, cores coated with an active ingredient-containing binder, tablets, granules, pellets or capsules.

Claim 3 (Currently Amended): The method as claimed in claim 1 ~~or 2, characterized in that wherein~~ the first film-forming coating agent is a copolymer of 25% by weight methyl methacrylate, 25% by weight butyl methacrylate and 50% by weight dimethylaminoethyl methacrylate.

Claim 4 (Currently Amended): The method as claimed in ~~one or more of claims 1 to 3, characterized in that~~ claim 1 wherein the second film-forming coating agent is a polymer having anionic groups which is a cellulose derivative, a polyvinyl acetate derivative or a (meth)acrylate copolymer.

Claim 5 (Currently Amended): The method as claimed in ~~one or more of claims 1 to 4, characterized in that~~ claim 1 wherein the film-forming coating agents are present in a mixing ratio of from 9:1 to 1:9 based on the total polymer content of the film coating.

Claim 6 (Currently Amended): The method as claimed in claim 1 ~~or 5, characterized in that wherein~~ two or more two-fluid nozzles or one or more three-fluid nozzles are employed as spray device.

Claim 7 (Currently Amended): The method as claimed in ~~one or more of claims 1 to 6, characterized in that~~ claim 1 wherein the spray application takes place in a drum coater, a coating pan, a fluidized bed apparatus or a spray sifter.

Claim 8 (Currently Amended): The method as claimed in claim 7, ~~characterized in that~~ wherein the spray application takes place by means of spray devices as fixed installation.

Claim 9 (Currently Amended): A pharmaceutical form, parts of pharmaceutical forms, food supplements or parts thereof ~~which can be produced by a method as claimed in one or more of claims 1 to 8~~ claim 1.

Claim 10 (Currently Amended): A pharmaceutical form or parts of pharmaceutical forms as claimed in claim 9, ~~characterized in that~~ wherein an active ingredient from the class of analgesics, antiallergics, antiarrhythmics, antibiotics, chemotherapeutics, antidiabetics, antidotes, antiepileptics, antihypertensives, antihypotensives, anticoagulants, antimycotics, antiinflammatory agents, beta-receptor blockers, calcium antagonists and ACE inhibitors, bronchospasmolytics/antiasthmatics, cholinergics, corticoids (for internal use), diuretics, enzyme inhibitors, enzyme preparations and transport proteins, expectorants, geriatrics, gout remedies, influenza remedies, hormones and their inhibitors, hypnotics/sedatives, cardiac drugs, lipid-lowering agents, parathyroid hormones/calcium metabolism regulators, psychoactive drugs, sex hormones and their inhibitors, spasmolytics, sympatholytics, sympathomimetics, vitamins, wound-treatment agents, cytostatics, nucleic acids, proteins or peptides, is present.

Claim 11 (Currently Amended): A pharmaceutical form or parts of pharmaceutical forms as claimed in claim 9 ~~or 10, characterized in that~~ wherein the pharmaceutical forms are multiparticulate.

Claim 12 (Currently Amended): A drum coater, coating pan, fluidized bed apparatus or spray sifter suitable for carrying out a method as claimed in ~~one or more of claims 1 to 8~~ claim 1, comprising one or more three-fluid nozzles as spray device.

Claim 13 (Currently Amended): ~~The use of one or more spray devices for carrying out a~~ A method as claimed in one or more of claims 1 to 8 claim 1 comprising utilizing one or more spray devices.
